Bamboos

[Download image](#)

Semiarundinaria fastuosa

A collection of bamboos is to be found around the building known as “The Gardener’s Shed”. Two species are particularly worthy of note here, namely *Phyllostachys nigra* in the shape of a forest of black bamboo which is one of the oldest in Spain, and *Bambusa vulgaris*, both of which are around 150 years old. Other species included in the collection are *Otatea*, *Pseudosasa*, *Hibanobambusa*, *Indocalamus*, *Shibataea*, *Semiarundinaria* and *Pleioblastus*.
